

## Erratum

John J. O'Shea

In the review entitled "Jaks, STATs, Cytokine Signal Transduction, and Immunoregulation: Are We There Yet?" (1997, *Immunity* 7, 1–11), the Jaks associated with the interferon  $\gamma$  receptor (IFN $\gamma$ R) were incorrectly identified in Figure 4. The revised figure (above) shows the correct association, namely that the IFN $\gamma$ R  $\alpha$  chain associates with Jak1 and that the IFN $\gamma$ R  $\beta$  chain associates with Jak2. For a detailed review, the reader is referred to Bach, E.A., Auguet, M., and Schreiber, R.D. (1997). The IFN $\gamma$  receptor: a paradigm for cytokine receptor signaling. *Annu. Rev. Immunol.* 15, 563–591.
